## FEATURES

## High dust resistance structure

By providing a rib structure for the units, it's ensure to raise an airtight and inprove high dust resistance. So that prevents foreign substance invasion.

## Minute electric current application

Double bridge gold-plating contacts cover minute electric current application of DC5V, 1 mA or more. Also double bridge silver-plating contacts cover DC5V 5mA. (50,000 cycle switching)

## Wide contact variations

3 kinds of contacts, single silverplating contacts, double bridge silver or gold-plating contacts that's a high contact reliability are available, which meets various usages.

Single silver-plating contacts

Double bridge silver-plating contacts

Double bridge gold-plating contacts

## High anti-flammability

High anti-flammable PBT (PolyButylene Terephthalate) plastic is adopted. (class UL94,V-0)

## Safety Structure on live portion

A terminal cover(Polycarbonate) is equipped as standard equipment for safety improvement.

## Chattering prevention

High-pressure springs on contact portion enhance vibration resistance performance.

Max. wire size is $\mathbf{5 . 5 m m}{ }^{\mathbf{2}}$
Max. wire size is 2 to $5.5 \mathrm{~mm}^{2}$ in spite of its small body.

## Combination of different contact units in one switch

Three different contact units can be assembled in one switch assembly.

* One switch unit can be provided with only one kind contact.

## Max. 20 unit assembly is available

Low twist structure of the switch enables to assemble long switches as many as 20 units (40 contacts). Wide range application such as parallel connection is available.

## Rated insulation voltage is 600 V

The rated insulation voltage is higher than the previous model. ( $250 \mathrm{~V} \rightarrow 600 \mathrm{~V}$ )

## SPECIFICATIONS (RATING, PERFORMANCE / NORMAL SERVICE CONDITION)

Standard: IEC60947-1, IEC60947-5-1

| Specification |  |  | GMZ |
| :---: | :---: | :---: | :---: |
| Rating | Rated insulation voltage (Ui) |  | 600 V |
|  | Lighthing impulse | $\pm 6 \mathrm{kV}(1.2 \times 50 \mu \mathrm{~s})$ |  |
|  | Rated current-carrying capacity (Ith) | 20A (silver contacts), 2 A (gold contacts) |  |
|  | Max. wire size | $5.5 \mathrm{~mm}^{2}$ |  |
|  | Screw size | M $4 \times 9$ |  |
| Performance | Withstand voltage | 2,500V AC / 1min. |  |
|  | Contuct resistance | $50 \mathrm{~m} \Omega$ or less (default) |  |
|  | Mechanical life | 500,000 times (angular speed: $5 \pi \mathrm{rad} / \mathrm{s}$ ) |  |
|  | Electrical life | Single silver contacts | 50,000 (110V DC 5A, L / R = 40ms) |
|  |  | Double bridge silver contacts | 100,000 (110V DC 5A, L / R = 40ms) |
|  | Shock resistance | $500 \mathrm{~m} / \mathrm{s}^{2}$ or more (6 directions) |  |
|  | Vibration resistance | Frequency: 16.7 Hz Amplitude: 3 mm Time: 1 hour (3 axial directions) |  |
| Normal service condition | Operating temperature | -20 to $60^{\circ} \mathrm{C}$ |  |
|  | Relative humidity | 45 to 85\% |  |
|  | Altitude | 2,000 m or less |  |

## HOW TO ORDER

(1) Standard type coding

## 

| No. | Item | Description | Remark |
| :---: | :---: | :---: | :---: |
| (1) | Basic type |  |  |
| (2) | Fix bolt | 1: M6 bolt X 2 pcs (front), 10 mm |  |
|  |  | 2: M6 bolt $X 4$ pcs (front and back), 10 mm |  |
|  |  | 3: M6 bolt X 2 pcs (front), 13 mm |  |
|  |  | 4: M6 bolt X 4 pcs (front and back), 13mm |  |
|  |  | 5: M6 bolt X 2 pcs (front), 15 mm |  |
|  |  | 6: M6 bolt X 4 pcs (front and back), 15 mm |  |
| (3) | Shaft shape | S : Standard shaft 8 mm (square) | Please see the "Shaft shape" |
| (4) | No. of units | 2 to 20 |  |
| (5) | Contact type and No. of contacts | $\mathrm{S} \square$ : Unit No. of single silver contacts |  |
|  |  | W $\square$ : Unit No. of double bridge silver contacts |  |
|  |  | $\mathrm{U} \square$ : Unit No. of double bridge gold contacts |  |
| A | Center position code | ex) ST: operation at the center of T position | Please see the "Operating position" |
| B | Operating angle | ex) 090: operation angle $=90^{\circ}$ |  |
| C | Contact ON angle | No code: Contact ON angle $=22^{\circ}$ | Please see the "Contact ON angle" |
|  |  | S: Contact ON angle $=19^{\circ}$ |  |
| D | Contact arrangement |  | Please see the "Contact arrangement" |

(2) Special type coding

## OPERATING POSITION

## CONTACT ARRANGEMENT

$\frac{\mathbf{B}}{4} \frac{\mathbf{A}}{+}+\frac{\mathbf{B}}{1}+\frac{\mathbf{A}}{4} \quad$| Code | Contact type |
| :---: | :---: |
| No code | Single silver contacts |
| $W$ | Double bridge silver contacts |
| $U$ | Double bridge gold contacts |

## SHAFT SHAPE

Code: S

## OUTLINES

| No. of Units | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
