

## INDEX FOR B / BH TYPE CAM-OPERATED SWITCH

| Item | Page | Item | Page | Item | Page |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Features | A1 | Handle code | A6 | Voltmeter / Ammeter Switches | A27 to $\mathbf{3 0}$ |
| Specifications / Breaking Capacity | A2 | Standard Specifications | A7 to 11 | Contact Arrangement <br> of Standard Switches | A31 to 48 |
| How to Order | A3 | Special Specifications | A12 to $\mathbf{2 2}$ | Accessories | A49 to $\mathbf{5 0}$ |
| Notch code | A4 to 5 | Mounting Hole Dimensions | A23 | Nameplates | A51 to $\mathbf{5 4}$ |
| Contact code | A5 | Contact Arrangement Diagram | A24 to $\mathbf{2 6}$ | Technical Information | A55 to $\mathbf{5 6}$ |

## FEATURES

Heavy-duty mechanical durability against high-frequent switching
Since the optimal layout of components and by using materials with high wear resistance for the mechanical section, it can be provides accurate operation feeling and durability against high-frequent switching up to 5 million times.

The terminal arrangement greatly improves wiring efficiency
No up-screw terminal is adopted. It can be quickly wired from the back for the alternate terminal arrangement.

Campability both compact body and high breaking capacity and yet greatly improved breaking capacity
Larger breaking capacity of the switches generally requires that the main body enlargment. However, Fuji's control switches has achieved downsizing while increasing the breaking capacity. This breakthrough has been made possible by optimally designing the cam shapes and the angle of the movable contact parts for obtaining max. switching speed mechanically.
This allows you to determine the setting values (voltage and current) with allowance.

High-performance engineering plastics ensure high quality and high reliability
For the body, polycarbonate resin is used, which has a high level of performance among engineering plastics. The material greatly improves strength and resistance against environment (temperature, humidity, vibrations, etc.), which are particularly important for the applications related to heavy electric machineries. The contacts and mechanical parts are transparent to facilitate checking the contacting part.

Rolling action of contact mechanism improves contact stability
In the contact mechanism, the movable contact makes contact with the stationary contact at one point and then gradually increases the contact area while rolling on it. This rolling action minimizes the part exposed to the arc that is generated at the first contact or breaking, thereby maintaining much higher contact stability than the former product.

## SPECIFICATIONS (RATINGS, PERFORMANCE)

Breaking capacity [electrical life of $\mathbf{5 0 0 , 0 0 0}$ operations (class 1)]

| AC |  |  | DC |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rated voltage <br> (V) | Rated operating current (resistance load) (A) | Rated operating current (inductive load) (A) | Rated voltage <br> (V) | Rated operating current (resistance load) (A) | Rated operating current (inductive load) (A) |  | 2 contacts used in series Rated operaing current (inductive load) (A) |
| 110 | 20 | 15 | 24 | 15 | 10 | 20 | 20 |
| 220 | 15 | 10 | 48 | 10 | 6 | 18 | 15 |
| 440 | 4 | 3 | 110 | 3 | 1.5 | 4.5 | 4 |

## HOW TO ORDER

(1)Type (There's contact arrangement at diagram)

## BH-T2002-LD-B54-000 <br> (1) <br> (2) <br> (7) <br> (8) <br> (9)

(2)Type (There's no contact arrangement at diagram)

## BH-T2-2B2A-LD-B54-000 <br> (1) $\overline{\text { (3) }} \overline{4)} \overline{(5)} \overline{(5)} \overline{(6)})$ (8)

| No. | Item | Code | Detail |  | Note |
| :---: | :---: | :---: | :---: | :---: | :---: |
| (1) | Basic type | B | Screw side is up / down |  | There are exceptions. |
|  |  | BH | Screw side is right / left |  |  |
| (2) | Contact arrangement | Please see page A31 for contact arrangement diagram. |  |  | - |
| (3) | Notch code | Please see page A4 to 5 for mechanical operation method. |  |  | - |
| (4) | No. of units | 1~ | No. of units |  | Max. unit No. varies from notch and type of switches. |
| (5) | No. of contacts | $1 \sim$ | No. of contacts |  | 1 unit has 2 contacts. (There is only 1 contact in 1 unit in some cases.) |
| (6) | Contact code | Please see page A5 for Contact code. |  |  | About representation of contact code, please refer to the following picture. |
| (7) | Handle code | Please see page A6 for Handle code. |  |  | - |
| (8) | Color of handle / flange | Munsell color code |  |  | - |
|  |  |  | Handle | Flange |  |
|  |  | B | N1.5 | N1.5 |  |
|  |  | BG | 7.5BG3/3.5 | 7.5BG4/1.5 |  |
| (9) | Nameplate | Please see page A51 to 54 for Nameplate. |  |  | Please select a nameplate No., when the nameplate No. is not specified, plain nameplate is attached. |

* For the type that corresponding to the all kinds of standard, please contact us separately.

About No. of contacts / Contact code

B type ... Screw side is up / down

BH type ... Screw side is right / left

[^0]:    * Inductive load: For AC: Power factor 0.6 to 0.7 (Class: AC11)

    For DC: Time constant $40 \pm 6 \mathrm{~ms}$ (Class: DC12)
