

Cam-operated switch structure is used for the contact, resulting in compact body and high performance.

The back terminal structure enables high-density mounting.

Incorporating a limiting resistor, the LED can be directly turned on from 110 V DC power supply.

4-element, highly-bright LED provides illumination of two colors.
Use of connector applicable to a wire of up to $2 \mathrm{~mm}^{2}$ size

The surface area is approx. 30 mm square.
Approx. 50\% smaller than the conventional model. *

## SPECIFICATIONS (RATINGS, PERFORMANCE)

| Type <br> Specification | UL TYPE |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Rated insulation voltage (Ui) | 250 V |  |  |  |
| Rated currenticarrying capacity (th) | 1A |  |  |  |
| Instantaneous operating current | 20A/1 sec. |  |  |  |
| Connectable wire size | $0.5 \sim 2.0 \mathrm{~mm}^{2}$ |  |  |  |
| Withstand voltage | Between live line and ground | $2,000 \mathrm{~V}$ AC / 1 min | Between individual live lines | 1,000V AC / 1 min |
| Lightning impulse | Between live line and ground | $\pm 7 \mathrm{kV} / 3$ times for each pole (1.2/50 $\mu \mathrm{s}$ ) | Between individual live lines | $\pm 3 \mathrm{kV} / 3$ times for each pole ( $1.2 / 50 \mu \mathrm{~s}$ ) |
| Contact resistance | $50 \mathrm{~m} \Omega$ or less |  |  |  |
| Mechanical life | 100,000 operations or more (1200 times / hour) |  |  |  |
| Electrical life | 100,000 operations or more ( $0.5 \mathrm{~A} / 110 \mathrm{~V} \mathrm{DCL} / \mathrm{R}=40 \mathrm{~ms}$ ) |  |  |  |
| Shock resistance | $500 \mathrm{~m} / \mathrm{s}^{2}$ |  |  |  |
| Vibration resistance | $20 \mathrm{~m} / \mathrm{s}^{2}(10 \sim 150 \mathrm{~Hz})$ |  |  |  |
| Minimum applicable load | 24 V 10 mA (in suitable operating conditions) |  |  |  |
| Operating temperature | -25 to $50^{\circ} \mathrm{C}$ |  |  |  |
| Storing temperature | -40 to $70^{\circ} \mathrm{C}$ |  |  |  |
| Altitude | 2,000 m or less |  |  |  |

## Making and breaking capacity

|  |  | Resistive load |  | Inductive load |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 10,000 operations | 100,000 operations | 10,000 operations | 100,000 operations |
| A | AC110 V | 10 A | 5 A | 10 A | 3 A |
|  | AC220 V | 7 A | 3 A | 5 A | 2 A |
| $\begin{aligned} & \mathbf{D} \\ & \mathbf{C} \end{aligned}$ | DC5 V | 10 A | 10A | 10A | 7 A |
|  | DC12V | 10A | 6 A | 10 A | 4A |
|  | DC24 V | 10 A | 3 A | 10A | 2 A |
|  | DC48 V | 10 A | 2 A | 7 A | 1 A |
|  | DC110 V | 7 A | 0.7 A | 5 A | 0.5A |
|  | DC125 V | 5 A | 0.5 A | 4A | 0.3A |

*Inductive load For AC : Power factor 0.6 to 0.7 For DC : Time constant $40 \pm 6 \mathrm{~ms}$

## $\triangle$ Precautions for use

In the above table, interruption current indicates actual performance of the UL type micro cam-operated switch. During use of the UL type, make sure that the rated operating current and instantaneous operating current do not exceed 1 A and $20 \mathrm{~A} /$ sec. respectively.

## HOW TO ORDER

$\frac{\Delta L}{(1)}-\frac{2001}{(2)}-\frac{235}{(4)} \frac{\square}{(5)} \frac{\square}{(6)} \frac{\Delta}{(7)} \frac{C}{(9)} \frac{M}{(10)}$

## TECHNICAL DATA

## LED replacement

If you replace the built-in LED, the color of the LED should conform to the original color. The internal resistance varies depending on the color. If you intend to change the color of the LED, please consult us, or check the following circuit.

The LED is easily affected by static electricity. When handling the LED, do not touch the LED lead wire directly by hand, and do not allow a voltage to be directly applied to the LED.

[^0]:    ${ }^{*}$ For the details, please inquire us separately.
