

# Environment Policies

## - Philosophy -

Fuji Electric Industry Co., Ltd. shall strive to continuously reduce the burden on the environment through the sustainable utilization of resource or energy and hand over the sound environment to the next generation.

We are to contribute to the continuous growth of society by our positive environmental conservation activities for our area and earth through our business operations.

## Environment Policies

Based on the philosophy declared above, we shall continuously reduce the burden on the environment through the company-wide activities on planning, development, design, production and sales of electric control parts.

1. We will understand the effects to the environment of our business activities and products and prevent the pollution. We shall continuously improve the environment management system as well.
2. We will carefully comply with the relevant regulations, controls, ordinances and other requirements we agree with.
3. We will set the important theme of environment management as follows, and implement them in our business activities and production of the products.
  - (1) Products planning & development group shall reduce the burden on the environment through development of the new products with low burden and improve the burden of existing products.
  - (2) Production group shall reduce the burden on the environment through the improvement and development of new production technology and implement of the control and watching the discharge.
  - (3) Sales and physical distribution group shall improve the burden on the environment related to the distribution.
4. We will promote saving resource, saving energy and 3R (reduce, reuse, recycle) and reduce the industrial waste in every business activity.
5. To accomplish the environment policies we will set the environmental purpose and target feasible on the technical/economical standpoint and review the plan and carry out the environmental protection.
6. This environment policies shall be widely known to all the employees and at the same time opened to the public. We request our stake holders for the comprehension and cooperation of these policies.
