

# AUXILIARY SWITCH

## FEATURES

Control devices for the circuit breaker play important roles for protecting the power system. It is an auxiliary switch that functions interlocking with the main circuit switching mechanism of the circuit breaker or the insulated switch, therefore high reliability is required.

### ■ Rotary type auxiliary switch

- Cam-operated type
  - B type auxiliary switch
    - Applicable for shutting down relatively large current in frequently switching uses.
  - BMZ and CMZ type auxiliary switches
    - High-reliable auxiliary switches that have higher breaking capacity and higher impact resistance (prevention of chattering) than the conventional ones.
    - All the wiring terminals are located on one side, for making wiring work easier.
- Drum type
  - M type auxiliary switch
    - Compactly designed and yet relatively high in breaking performance; therefore most suitable for miniaturize for the equipment.

### ■ Push-type auxiliary switch

#### ● UX-33A

Applicable for a high-voltage electromagnetic contactor or a vacuum circuit breakers. The contact parts has a structure that can be incorporate a magnet, so that it's possible to increase the breaking capacity of the contacts.

## SPECIFICATIONS (RATINGS, PERFORMANCE)

Item	B-AUS	BM-AUS	BMZ	CMZ	S-AUS	M-AUS	UX-33A
Rating	600V				250V		
	20A				10A		
	M4×9				M3.5×7/PC board		
Performance	500,000				30,000		
	(110V DC 1.5A L/R=40ms)				(110V DC 5A L/R=40ms)		
	1,000,000				30,000		
Standard operating condition	2,500V for 1 min.				2,500V for 1 min.		
	50 m Q or less				50 m Q or less		
	-20°C to 60°C (No freezing)				-20°C to 60°C (No freezing)		
Altitude	2,000 m or less				1,000 m or less		

## HOW TO ORDER

Please choose a code below. Please ask us for special specifications (contact arrangement, shaft shape, confirmable standard etc.).

### [B-AUS type]

Ex. 1)

**B-AUS-05X**

Basic type

Spec No.

### [BM-AUS type]

Ex. 1)

**BM-AUS 1-05X**

Basic type

Spec No.

Fix bolt number

1	2 bolts of front (less than 7 units)
2	4 bolts of front and rear (more than 8 units)

Ex.2)

**B-AUS 5-5 (1A1B)**

Basic type

No. of units

Contact arrangement

Ex.2)

**BM-AUS 1- 5 (1A1B)**

Basic type

No. of units

Contact arrangement

Fix bolt number

1	2 bolts of front (less than 7 units)
2	4 bolts of front and rear (more than 8 units)

### [BMZ type]

Ex. 1)

**BMZ-03X**    -

Basic type

Spec No.

### [CMZ type]

Ex. 1)

**CMZ-03X**    -

Basic type

Spec No.

Ex.2)

**BMZ-5 (1A1B)**

Basic type

Contact arrangement

Ex.2)

**CMZ-5 (1A1B)**

Basic type

Contact arrangement

### [S-AUS type]

Ex. 1)

**S-AUS-03X**    -

Basic type

Spec No.

### [M-AUS type]

Ex. 1)

**M-AUS 6-3 (1A1B)**

Basic type

No. of units

Contact arrangement

### [UX-33A type]

**UX-33A 3A2B1DB-MR**

Basic type

Tropical region type (Special products)

Contact arrangement

5A1B	5A	1DB
4A2B	4A1B1DB	
3A3B	3A2B1DB	
2A4B	2A3B1DB	
1A5B	1A4B1DB	

A.B contact...Standard contact

DB contact...Delay contact

※1DB contact parts (terminal No. 25-26) has a magnet that's a standard structure.

However, please specify when putting magnet into the 1A contact parts (terminal No. 11-12)

※Terminal No. 26 and 12, wiring on the ⊕ side is standard.

●In case of tropical treatment products, due to produced an order, please ask us about the delivery time and price separately.
